Data holder user journey

Ready to start

My organisation begins developing and testing a CDR solution to integrate into the CDR ecosystem. I'm assigned as the authorised contact person to manage the end-to-end process.

On-boarding preparation

Once successful I begin CDR on-boarding, I'm provided with an overview of the upcoming process and made aware of key next steps from the ACCC. At this point I'll also need to accept all the relevant licence agreements.
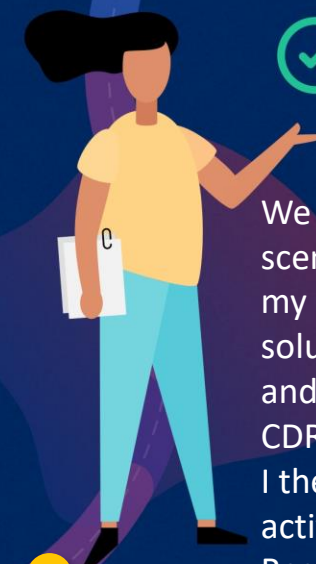

Activation

Activation application is approved. My organisation is now active and visible on the CDR Register.

Registration

I establish an account on CDR Participant Portal, verify my identity, finalise my account and register my organisation as a data holder.

Conformance Testing

I confirm my organisation's CDR solution is compliant with CDR's Standards and Rules. My Authorised CTS Tester completes robust conformance testing of our solution in CDR's Conformance Testing Suite.

We pass all the test scenarios and I confirm my organisation's CDR solution is compliant and ready to enter the CDR ecosystem. I then apply to be activated on the CDR Register.
